

Reporting Period:
December 26, 2021
to January 27, 2022
Note: Missing
dates normally
mean that the wind
contributed to boats
not going out to
fish.

I have a NEW email if you can send me any
fishing news or pictures: lyncurt0@gmail.com

12/25 to 01/27/22

General information: What I have for
you is short but not so sweet. I was back in
Arizona for most of this period, and
mostly heard little fishing news. Lots
of news about cold temperatures,
winds and even some rain combined
with boat problems to keep news
scarce. Surface water temperatures
dropped to around 54 degrees, so
trolling was not effective, but some
bottom fish were caught. About a
week to ten days ago, there was a
good period where medium to large
Yellowtail were caught at Turner,
Dead Man (especially) and Esteban.
Unfortunately, the trend did not last
for long. Apparently, about a week

ago some decent White Sea Bass were caught by
Old Kino fishermen with nets in the channel
around the Mexican Navy compound to Punta
Chueca. Hopefully the water will start to warm
next month and everyone will get their boats
running again!

01/25/22

WET WILLY caught limits of Yellowtail
at Turner and Esteban and HILL BILLY YACHT
caught limits of Yellowtail at Turner as well as
Goldies off the bottom. Water temperature was
around 58 degrees.

RESCUE ONE

- Provides continuous tracking of boat trips
in the Sea of Cortez and land vehicle trips
in the nearby Sonoran Desert.
- Initiates searches and/or rescues when
needed.
- Maintains a coordination center for any
emergency: death, illness, accidents,
police assistance, etc.
- Serves as a focal point for radio or
telephone communication throughout the
community.

RESCUE ONE uses Channel 26 VHF
